English
Hindi

Projects

Sentinel - (Using Vuforia AR Engine)

An interactive software for event organisers focussed on identification of tickets, animated response, and storage of pictures and user details in a backend database on AWS buckets.

Made for Wowsome.

Research Project on Risk Analysis

An ongoing research project to analyse risk-taking behavior of high IQ individuals to improve existing Artificial Technologies.

E-Commerce Portal

Similar in functionality to Quikr/Olx, this portal was created as a semester project for IT Workshop II.

<https://github.com/500swapnil/72hours> - Link for the Project repo.

CSE Algorithms

A portal with educative material and common algorithms coded and well-explained for the benefit of new students. A pro-bono initiative by some students of my batch, for the coming batches.
